

SPECIFICATION AMENDMENTS

IN THE SPECIFICATION:

Please amend the specification as follows. Note that the paragraph numbers correspond with the paragraph number of the original application, not the paragraph numbers listed in the published application.

Please replace paragraph [0048] with the following amended paragraph:

[0048] By virtue of a seal between the body/barrel section 124 of the pressure driver and a container 140 in which implant material ~~140~~ resides, the implant material is drawn into the expanding drive chamber section as illustrated. While a threaded interface ~~140-142~~ between the container and barrel elements is shown, other means of securing and forming a pressure tight seal between the members may be employed. For example, various clamping, sliding, or other arrangements may be employed.
